

## **Amendments to the Claims**

1. (currently amended) A toy kitchen comprising:  
a main unit ornamented to look like a kitchen, the main unit having a front wall, opposite side walls, and a countertop extending lengthwise between the side walls; and  
a repositionable island ornamented to look like a kitchen island, the repositionable island being removably attachable to the front wall of the main unit with the repositionable island extending away from the front wall of the main unit perpendicularly to the lengthwise extent of the countertop thereby to form at least two separate play areas at respective sides of the repositionable island.
2. (previously presented) The toy kitchen of claim 1, wherein the repositionable island is removably attachable to the main unit at at least one of the side walls when removed from the front wall of the main unit.
3. (previously presented) The toy kitchen of claim 1, wherein the main unit and the repositionable island each further comprise at least one toy accessory selected from the group consisting of a sink, a stove top, an oven, a cutting surface, a microwave oven, a dishwasher, a refrigerator, a freezer, a coffee maker, an ice dispenser, a toaster, a countertop, a clock, a set of shelves and a cabinet.
4. (cancelled)
5. (cancelled)
6. (previously presented) The toy kitchen of claim 1, wherein the repositionable island, when removed from the front wall of the main unit, is removably attachable to either one of the sides of the main unit to form a continuous play area extending substantially along a single plane.
7. (cancelled)

8. (cancelled)

9. (previously presented) A toy kitchen comprising:

a main unit having a front surface; and

a repositionable island removably attachable to the front surface of the main unit with the repositionable island being perpendicular to the front surface of the main unit thereby forming at least two separate play areas;

wherein the main unit includes a front side and a rear side, and wherein an opening is defined within the main unit extending from the front side to the rear side, and wherein the main unit further comprises at least one of a window sill and a pair of shutters positioned at the opening.

10. (cancelled)

11. (cancelled)

12. (previously presented) A reconfigurable toy kitchen comprising:

a first unit extending along a first substantially vertical longitudinal plane between opposite ends thereof; and

at least one removable and repositionable second unit extending along a second substantially vertical longitudinal plane, the second unit being removably attachable to the first unit in a first position located between the opposite ends of the first unit with the second longitudinal plane perpendicular to the first longitudinal plane to form at least two separate play areas, and the second unit being removably attachable to the first unit in a second position in which the first and second longitudinal planes are substantially coplanar.

13. (previously presented) The reconfigurable toy kitchen of claim 12, wherein the first position defines first and second play areas, the first and second play areas each partially bounded by one side of the first unit and one side of the second unit, and wherein the second position defines a continuous play area extending along one side of the first and second units.

14. (previously presented) The reconfigurable toy kitchen of claim 12, wherein the first unit is a main kitchen unit and wherein the second unit is an island.

15. (cancelled)

16. (previously presented) The reconfigurable toy kitchen of claim 12, wherein the first and second units each further comprise at least one toy accessory selected from the group consisting of a sink, a stove top, an oven, a cutting surface, a microwave oven, a dishwasher, a refrigerator, a freezer, a coffee maker, an ice dispenser, a toaster, a clock, a set of shelves and a cabinet.

17. (previously presented) The reconfigurable toy kitchen of claim 12, wherein the first unit is removably positioned to the second unit in at least the first and second positions.

18-21. (cancelled)

22. (currently amended) A toy kitchen comprising:  
a main unit ornamented to look like a kitchen, the main unit having a front wall,  
opposite side walls, and a countertop extending lengthwise between the side walls; and  
a repositionable island ornamented to look like a kitchen island, the  
repositionable island being removably attachable to the front wall of the main unit with  
the repositionable island extending away from the front wall of the main unit thereby to  
form at least two separate play areas at respective sides of the repositionable island,  
and ~~The toy kitchen of claim 1, wherein~~ the repositionable island is being attachable to the front wall of the main unit at a location spaced inwardly from the side walls whereby each of the play areas is bounded by the front wall of the main unit and a respective end portion of the main unit.

23. (previously presented) The toy kitchen of claim 22, wherein the repositionable island has a countertop, and the countertop extends perpendicular to the countertop of the main unit when the repositionable island is attached to the front wall

of the main unit and forms a continuation of the countertop of the main unit when the repositionable island is attached to a side wall of the main unit.

24. (previously presented) The toy kitchen of claim 23, wherein the repositionable island is removably attached to the main unit at one of the front and side walls.

25. (previously presented) The toy kitchen of claim 1, wherein the repositionable island is removably attached to the front wall of the main unit.

26. (previously presented) The toy kitchen of claim 2, wherein the repositionable island is removably attached to the main unit at one of the front and side walls.

27. (previously presented) The toy kitchen of claim 2, further comprising a second repositionable island removably attachable to the main unit at one of the front and side walls.

28. (previously presented) The toy kitchen of claim 9, wherein the repositionable island is removably attached to the front surface of the main unit.
